Your Touchstone Energy® Cooperative

Make a switch to save energy...

Sign me up for Flint Energies' Switch N' Save program!

When all of us use electricity more efficiently, everyone wins. That's why Flint Energies offers the Switch N' Save program. When you allow Flint to install a load management switch at your home, you'll save energy. As a reward, you'll save money through bill credits for participating.

First, you receive a \$36 bill credit for signing up and meeting with an installation technician to have a Switch N' Save device installed in your home. In October, you'll receive a \$25 bill credit following the successful operation of the Switch N' Save program.

Here's how it works

During times when many people need electricity at once, Flint Energies must meet that demand. At a certain point, additional – and more expensive – generation units are needed to supply the energy. This increases the price of electricity.

Switch N' Save uses a device to briefly interrupt the flow of power to central air conditioners during times of high demand for electricity. Electric water heaters and pool pumps are cycled off between 2 p.m. to 7 p.m. from June to September on days when demand for electricity is at its highest. (Most participants don't even notice.)

By shifting the time some people use energy, Flint Energies can manage the demand for it and decrease the need to build new power plants. This also helps keep the cost of electricity stable – and that benefits everyone.

Flint Energies will not normally control appliances on weekends or holidays. The program could operate during critical times and possibly in the winter months, if the demand for power becomes so great that it creates a need to manage the use of electricity.

Signing up is easy. Call us today at 988-3902 in Warner Robins or toll free at 1-866-988-3902 to schedule an appointment.

**Switch N' Save.
A switch to help the environment.
And the savings are passed
along to you.**

Please contact me about installing my switch(es).

Member Name

Account Number

Address (Physical address where central AC/heat pump unit, water heater, and/or pool pump is located. Please no P.O. Boxes.)

Owner Renter

Call me to set a time to install my indoor/outdoor switch(es):

- Central AC/Heat Pump Unit
- Water Heater (Someone must be present for installation to an electric water heater.)
- Pool Pump

After the switch(es) has/have been installed, you will see the first of your Switch N' Save credits on your Flint Energies bill!

You'll enjoy saving money, too.

In Warner Robins, call 988-3902
or toll free 1-866-988-3902.
